

MEETING DATE/TYPE: **STUDY SESSION MEETING** **5-14-19**

DEPARTMENT: **Public Works**

AGENDA ITEM: Presentation by Public Works on the Annual Water Withdrawal and Use Report

Approved By: Michael Lamar, City Manager

Item Summary

Several annual reports for Calendar Year 2018, are required to be submitted to the Arizona Department of Water Resources (ADWR) by March 31st. These include the Annual Withdrawal and Use Report, Assured Water Supply Provider Supplement, Recovery Well Reports, and Underground Water Storage Report.

Water users, like the City, who pump groundwater from non-exempt wells in Active Management Areas must report withdrawals annually to ADWR. This information enables the agency to determine how much and where water is being used. Users are also required to pay annual fees for groundwater withdrawal and recovery of long-term storage credits. The fees are used to offset the cost of managing these resources, and to fund augmentation projects and conservation efforts. The 2018 fees paid by the City of Prescott totaled \$10,300.34.
